Office Action Summary	Application No. 10/561,742	Applicant(s) JONSSON ET AL.	
	Examiner Stephen Gravini	Art Unit 3749	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 5-16 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can not depend from another multiple dependent claim either directly or indirectly. See MPEP § 608.01(n). Accordingly, the claims 5-16 not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Proctor & Schwartz (GB 1.062,979). The claims are reasonably and broadly construed to be disclosed by Proctor as comprising:

a cabinet **A** having external walls and internal walls, said internal walls defining an interior region for receiving clothes;

a door connected to said cabinet for accessing said interior region, inherently disclosed in that reference since the illustrated clothing material could not be placed inside the disclosed cabinet without a door;

at least a supporting device **C** for supporting clothes within said interior region;

a ventilator **50**;

water supply means **72**;

an ultrasonic nebulizer **70** operatively associated to said water supply means; characterized in that the air within said interior region is recirculated by said ventilator through an air duct located between said internal walls and said external walls forming a closed loop with said internal region as shown in figure 2. Proctor also discloses the claimed said water supply means comprising a removable water reservoir feeding a pocket hydraulically connected thereto as shown in figure 1, characterized in that said pocket is associated with a water level measuring device to monitor the absence of water inside said removable water reservoir , inherently disclosed in that reference because an operator of the disclosed invention would need to monitor water absence otherwise the disclosed invention would be inoperative, and an air duct extending substantially along the whole height of the apparatus as shown in figure 1.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).
